The course focused on the latest developments in critical care. The course covered a wide range of topics, including the management of respiratory failure, shock, and sepsis. The course also featured a number of guest speakers, including Dr. Peter Safar, who is considered to be the father of modern CPR.

## Course Description

The course was divided into four sections:

1. Respiratory Failure
2. Shock
3. Sepsis
4. Other Topics

The section on respiratory failure covered the following topics:

- The pathophysiology of respiratory failure
- The diagnosis of respiratory failure
- The management of respiratory failure

The section on shock covered the following topics:

- The pathophysiology of shock
- The diagnosis of shock
- The management of shock

The section on sepsis covered the following topics:

- The pathophysiology of sepsis
- The diagnosis of sepsis
- The management of sepsis

The section on other topics covered the following topics:

- The use of ultrasound in critical care
- The use of echocardiography in critical care
- The use of transesophageal echocardiography in critical care
- The use of fiberoptic bronchoscopy in critical care
- The use of pulmonary artery catheters in critical care
- The use of mechanical ventilation in critical care

## **Guest Speakers**

The course featured a number of guest speakers, including:

- Dr. Peter Safar, who is considered to be the father of modern CPR
- Dr. Robert Bartlett, who is a leading expert in the management of respiratory failure
- Dr. Charles Rice, who is a leading expert in the management of shock
- Dr. John Carrico, who is a leading expert in the management of sepsis

The Annual Utah Postgraduate Course In Anesthesiology 1986 was a great success. The course provided attendees with the latest information on the management of critical care patients. The course also featured a number of guest speakers, including Dr. Peter Safar, who is considered to be the father of modern CPR.
