

# Even If You're Non-MBA and Have Never Managed an Agile Project Before, You Can Still Succeed

Agile project management is a popular approach to software development that emphasizes flexibility, collaboration, and continuous improvement. While it can be a great way to improve project outcomes, it can also be daunting for those who are new to it, especially if they don't have an MBA or any prior experience managing agile projects.

## How to learn Scrum in 60 minutes: even if you are a non MBA and never managed an Agile Project before...

However, with the right approach and a willingness to learn, anyone can succeed in agile project management, regardless of their background. Here are a few tips for non-MBA project managers who are new to agile:

- **Start by learning the basics of agile.** There are many resources available online and in libraries that can help you learn the basics of agile project management. Once you have a good understanding of the concepts, you can start to apply them to your own projects.
- **Find a mentor or coach.** If you know someone who has experience managing agile projects, ask them if they would be willing to mentor or coach you. A mentor can provide you with guidance and support as you learn the ropes.
- **Get involved in an agile community.** There are many agile communities online and in person where you can connect with other agile practitioners. This is a great way to learn from others and share your own experiences.
- **Don't be afraid to ask for help.** If you're struggling with something, don't be afraid to ask for help from your team, your mentor, or anyone else who is more experienced with agile project management.
- **Be patient.** Learning agile project management takes time and practice. Don't get discouraged if you don't see results immediately. Just keep learning and applying the concepts, and you will eventually see success.

Agile project management can be a great way to improve project outcomes, and it is something that anyone can learn, regardless of their background. With the right approach and a willingness to learn, you can succeed in agile project management and help your team achieve its goals.

Here are some additional tips for non-MBA project managers who are new to agile:

- **Be humble.** Remember that you are new to agile, and be willing to learn from others.
- **Be open-minded.** Agile is a different way of working, so be open to new ideas and approaches.
- **Be collaborative.** Agile is a team sport, so be willing to work with others and share your ideas.
- **Be flexible.** Agile projects are constantly changing, so be prepared to adapt to change.
- **Be passionate.** Agile project management can be challenging, but it can also be very rewarding. If you are passionate about your work, you will be more likely to succeed.

If you follow these tips, you will be well on your way to success in agile project management.
