Causes of Civil War

There are many factors that can contribute to the outbreak of civil war. Some of the most common causes include:

* **Economic inequality:** When there is a large gap between the rich and the poor, it can create resentment and social unrest. This resentment can eventually boil over into violence. * **Political oppression:** When a government is unresponsive to the needs of its citizens, or when it violates their basic rights, it can create a climate of fear and distrust. This can lead to civil war as citizens seek to overthrow the government and establish a more just society. * **Ethnic or religious conflict:** When different ethnic or religious groups live in close proximity, it can lead to tension and conflict. This conflict can escalate into civil war if the groups are unable to find a way to peacefully coexist. * **External intervention:** In some cases, civil war can be sparked or fueled by foreign powers. These powers may provide financial, military, or political support to one side of the conflict, in order to advance their own interests.

This can have a devastating impact on the livelihoods of ordinary people. * **Social unrest:** Civil war can also lead to
